## RISK CONTROL (Removing the hazard or reducing the risk)

The WHS Regulations (Regulation 36) require us to follow the Hierarchy of Control measures. Elimination is the first choice in controlling hazards. Where elimination is not practicable, substitution, isolation and engineering controls should be considered next. Administrative controls and personal protective equipment should only be used when other control measures have been considered but are not practicable.

| Hazard Type                                                                                                                                                                                         | Yes / No | Hazard Description                                                           | C | L | R    | Control Methods in Place                              | Yes / No | NA | Comments / Recommended Improvements                                                              |
